ELECTION/RESTRICTIONS

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-8 and 19-34 drawn to computerized methods for a system to interpret a numerical data pertaining to a sample assay, classified in class 706, subclass 25.

Group II: Claims 9-18 drawn to a computerized method to analyze a numerical data pertaining to a sample assay, classified in class 706, subclass 25.

The inventions are distinct and divergent, each from the other because of the following reasons:

While the inventions of Group I and Group II are related as they are both computerized methods of dealing with numerical data pertaining to a sample assay, they consist of distinct steps and/or components and therefore have different modes of operation, different functions, or different effects. In the instant case the inventions of Groups I and II have different functions.

Critical features of Group I that are distinct from Group II include the limitations of representing data values as points on a graph and correcting data values based on magnitude. Critical features of Group II that are distinct from Group I include the limitations assigning numerical values to data values and making first and second corrections by comparing the data to a threshold value. The examination process requires a search of non-patent literature, U.S. patent publications, U.S. patents, as well

as foreign patent literature. The technical literature search of methods of graphical "interpretation" of data and methods of "numerical analysis" of data are not co-extensive. Thus, the search for these groups together would present an undue search burden as they are directed to methods and/or systems that are generally distinct and separate.

Because these inventions are distinct and divergent for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the inventions to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected inventions, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pablo Whaley whose telephone number is (571)272-4425. The examiner can normally be reached on 9:30am through 6pm.
